| 10. Newcastle under Lyme Planning Update | Elaine Moulton |
| 11. Local Councillor and Residents representatives comments | |
| 12. Any Other Business | All |
| 13. Date of Next Meeting | All |

Matters Arising from 20th February 2020:

- **Re highway concerns.** ST: Urban clearway/ double yellow lines falls outside of County Council's £7k budget, can put a case forward for this issue to be looked at on a larger scale and see if this can be priority to look at. NG to pass on comments made at the meeting. STagg – contacted local highways officer. Have meeting to discuss priorities over next 6-7 months and will raise this. Cost may be reviewed/ 'clubbed together' as sides of the road are in different council areas. Double yellow lines may be considered (urban clearway would not be, as this is not done in the Borough). NG – spoke to highways liaison officers, no response as yet. **[ONGOING – ACTION ST & NG]**
- Have started to drill new gas wells. Agreed with the EA. Due to end next week. DW requested that NUL EHO are informed in advance of any works **[RED TO CONFIRM REPORTING IS IN PLACE TO NUL EHO]**
- **Reporting of odours** – Council have set up portal (20/02) for people to report, these complaints will be automatically sent to Red. Officers from the Borough Council trying to attend as quickly as possible when a complaint comes in – looking at having someone on-call during the night. When officers have been out, worst odour detected was a 2/6. **DW to provide Red & EA with a breakdown of complaints – when received, plotted on a map with wind direction etc.** Need to be careful that numbers are not being duplicated/ triplicated if reports are coming in to the EA, Red and also the Council. **[DW to provide breakdown of complaints]**
