- Posishell – additional 20,000m³ of temporary capping due August 2021

OVERVIEW

WALLEYS
QUARRY

Installation of Pin Wells

- Landfill Gas Management Contractor CEL, Cotesbach Energy Limited are to install 10 additional pin wells to the S and NW flanks of site and decommission and replace 7 pin wells to the western flank.
- A Pin Well is a shallow depth gas extraction well used for environmental control and is complementary to the existing extraction infrastructure at the facility.
- Works are commencing 28 July 2021

FUTURE OPERATIONAL PLANS

- Working Locations Continue operations within the central area of site, with operations utilising Cell 3 as necessary.
- Capping approx. 20,000m² of PosiShell installation.
- Gas Infrastructure Installation of 17 pin wells
- Currently reviewing Landfill Gas Management Plan, with planned submission by 31 July 2021.
